Education

Ongoing **Software Engineering**, *CAECE University*, 5th year, Avg: 7 out of 10.
Expected graduation date: July 2020

Work Experience

Nov 2018 – To date **Senior Software Engineer**, Medallia, City of Buenos Aires.

Duties: Contributing on scaling Medallia Conversations product across current and new Medallia customers. Working on several Node.js microservices with an emphasis on product quality, precise execution and code reviews to further improve the quality of the product. Reworking the current CI pipeline to save build time and reduce tests inconsistencies.
Technologies: Node.js, Apache Kafka, PostgreSQL, Cassandra, Redis, Jenkins

Mar 2017 – Nov 2018 **Senior Fullstack Developer**, Elementum, City of Buenos Aires.

Duties: Served as a primary technical point of contact for Product teams and other stakeholders. Worked with various of Elementum's web applications and Node.js microservices to deliver impressive and relevant visualizations for our customers' business use cases.
Technologies: React, AngularJS, Node.js, Socket.io, Apache Kafka, MongoDB, Elasticsearch, Redis

Jan 2016 – Mar 2017 **Fullstack Developer**, Government of the city of Buenos Aires, Department of Transit and Transport, City of Buenos Aires.

Duties: Worked on several of the Department's projects, ranging from data visualizations to assist decision making to developing the Frontend and APIs of a PoC aimed at enforcing heavy vehicles lanes throughout the city.
Technologies: AngularJS, Node.js, Ionic, Leaflet, D3.js, Microsoft Azure Cloud

Sep 2014 – Dec 2015 **Fullstack Developer**, National Congress of Argentina, Parliamentary Digital Services, City of Buenos Aires.

Duties: Worked as part of a team developing services to parse and transform laws and other parliamentary documents from text to Akoma Ntoso XML schema (http://www.akomantoso.org/). Worked in the Frontend and APIs of parts of the National Congress of Argentina web page.
Technologies: AngularJS, Node.js, xQuery, eXist-db

Feb 2013 – Sep 2014 **SAP ABAP Developer**, TGV, City of Buenos Aires.

Oct 2010 – Oct 2012 **SAP ABAP Developer**, Politec Argentina, City of Buenos Aires.
